

Benchtop coiler

AMW2-S4

Efficient and fast coiling machine for pre-cut wires and cables

Andreas Mattwich
Elektrotechnik

Technical specifications are subject to change according to possible needs and without notice.

FEATURES

- Operating modes: manual and automatic
- At the automatic mode there are 12 length of wire - between 2 - 13 metres - which can be adjusted by a sequence switch
- After the machine was started by the footswitch, it will be stopped automatically
- In the automatic mode the machine works with the maximum speed of 175 U/min
- In the manual mode the coiling time is only controlled by the footswitch
- Permanent control of the motor current and automatic stop in case of overload
- Immediate stop of the machine by activating the footswitch in the automatic mode
- Emergency-stop-switch placed at housing

TECHNICAL SPECIFICATIONS

	AMW2-S4
Diameter of coiling plate	350 mm
Height of coiling bolts	100 / 150 mm
Central diameter	min 80 - max 290 mm
Diameter of wire	max 9 mm
Coiling speed	manual 80 – 100 – 125 - 175 U/min automatic 175 U/min
Motor power	0,16 KW
Dimensions & Weight	400 x 400 x 150 mm / 18 kg

CE Conformity: AMW2-S4 is fully complies with all CE and EMC equipment guidelines relative to mechanical and electrical safety and electromagnetic compatibility.

Note: we recommend to submit wire samples with the application required for preliminary examination.
