

## Feeding unit for PC 65

TF 65

Feeding unit for efficient crimping of insulated contacts

Technical specifications are subject to change according to possible needs and without notice.

## FEATURES

- Thanks to the plug-in connections and tool-free conversion, the PC 65 can be equipped with an automatic belt feed for insulated contacts within seconds
- The unit transports the terminal and positions it in the crimp die and thus guarantees fast and reliable processing
- The pressure monitoring system in the PC 65 safeguards the quality of the crimping process
- Compared to manual crimping tools, the processing time is significantly reduced
- Cost-effective alternative to applicator presses

## TECHNICAL SPECIFICATIONS

	<b>TF 65</b>
Accessories	for the PC 65
Cross-section range	0,5 - 6 mm <sup>2</sup>
Cycle time	<2 sec
Dimensions & Weight	387 x 422 x 418 mm / 2,6 kg

**CE Conformity:** TF 65 is fully compliant with CE regulations and EMC equipment guidelines for mechanical, electrical and electromagnetic compatibility.

**Note:** we recommend to send samples with the application requirements for a preliminary examination.

Quick and easy connection to the PC 65
