

Crimp machines

SERIES UP 14

Pneumatic bench presses for loose terminals - in various models

WEZAG[®]

Technical specifications are subject to change according to possible needs and without notice.

FEATURES

- Pneumatic press for crimping loose terminals with the use of special interchangeable matrices
- Radial locking mechanism
- Large catalog of standard applications for a wide range of terminals
- Excellent quality-price ratio it is suitable for small and medium productions
- Special applications on request

VERSIONS

- **U 14 BA**
Equipped with a hand lever for opening and closing the crimp insert
- **UP 14 Z**
Linear working mechanism and forced sequence control for additional assurance of the process quality

TECHNICAL SPECIFICATIONS

	Series Up 14
Crimping force	14 KN
Air supply	6 bar
Dimensions	300 x 125 x 260 mm
Weight	14,8 kg

CE Conformity: UP 14 series is fully compliant with CE regulations and EMC equipment guidelines for mechanical, electrical and electromagnetic compatibility.

Note: we recommend to send samples with the application requirements for a preliminary examination.

- Uninsulated terminals up to 10 mm²
- Insulated terminals up to 6 mm²
- Wire end ferrules up to 50 mm²

Application range
