

Crimp machines

SERIES UP 65

Pneumatic bench presses for loose terminals

WEZAG[®]

Technical specifications are subject to change according to possible needs and without notice.

FEATURES

- Pneumatic bench press for crimping terminals up to 300 mm²
- Thanks to the integrated hydraulic unit and operation with conventional 220 V/240 V power, can be used anywhere and at any time as a universal plug and play solution
- Special applications on request
- Specific range of adapters and tools for a wide variety of applications
- 2 user interfaces (Setup - Production), lockable
- Electronic piece counter
- React to different production orders with tool-free quickchange adapter system
- Contact hold function through programmable return stroke with 30 memory settings

OPTIONS

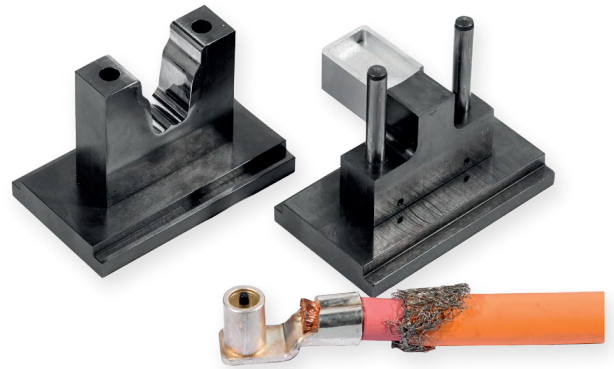

- Crimp force monitor

TECHNICAL SPECIFICATIONS

	UP 65
Crimping force	150 KN
Power supply	230 V / 50 Hz
Dimensions	590 x 240 x 620 mm
Weight	145 kg

CE Conformity: UP 65 series fully compliant with CE regulations and EMC equipment guidelines for mechanical, electrical and electromagnetic compatibility.

Note: we recommend to send samples with the application requirements for a preliminary examination.

Example for special customer application
